## PU PALM GLOVES

### INFORMATIVE NOTE cod. HJ072 / HJ082

Please read this briefing note through carefully prior to use and prior to any maintenance work. The purpose of the information contained herein is to assist and direct the user in choosing and using the PPE. Neither the manufacturer nor the distributor can be held liable for an incorrect use of the PPE. This briefing note must be kept for the duration of the PPE.

Glove model: **HJ072 / HJ082**

The UKCA mark means that these gloves are personal protective equipment conforming to the essential health and safety requirements set forth in the (EU) Regulation 2016/425 and have been certified by the notified body: SATRA TECHNOLOGY CENTRE LTD, Wyndham Way, Telford Way, Kettering, Northamptonshire, UK NN16 8SD

#### SIZES

| OUR SIZE REFERENCES | SIZES CONTEMPLATED EN 420:2003+A1:2009 |
|---------------------|--|
| 7                   | 7                                      |
| 8                   | 8                                      |
| 9                   | 9                                      |
| 10                  | 10                                     |
| 11                  | 11                                     |

The dexterity level of the fingers is equivalent to 5 out of 5.

The gloves meet the safety characteristics only if the size is right and worn properly.

Sizes available: 9(L) 10(XL)

#### RANGE OF USE

The gloves have been made as protection against mechanical risks such as abrasion, cutting, ripping and perforation.

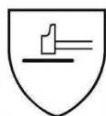

Do not use in contact with liquids.

They do not protect from chemical risks.

The protective capacities refer to the glove palm.

Keep gloves away from fire.

## PICTOGRAMS AND PROTECTION LEVELS

**EN388:2016 + A1:2018**  
**ENISO 21420:2020**

**4131X**

| MECHANICAL RISKS | MAX |
|------------------|-----|
| 4 abrasion       | 4   |
| 1 cutting        | 5   |
| 3 ripping        | 4   |
| 1 perforation    | 4   |

X – indicates that the glove has not been submitted to the test or the test method appears not to be suitable for the glove design or material.

0 – indicates that the glove falls below the minimum performance level for the given individual hazard.

The protective characteristics refer to new PPE, in good condition and that has never been subject to cleaning treatments.

### USE

Prior to use, make sure the gloves are in good condition by which we mean no cuts, holes or cracks, etc. If the gloves are not in perfect condition, replace them immediately.

The gloves must be used solely for the risks contemplated in this briefing note. Avoid using PPE near moving parts in which it could get entangled.

### CLEANING

It is advisable to use detergents compatible with the materials the gloves are made of, excluding all solvents and mechanical means that could damage them. Leave the gloves to dry in the air before using them again.

### STORING

Keep the gloves in a clean, dry place, away from sources of heat and direct sunlight. If stored as indicated, the gloves will keep their characteristics for a long time. The user must always inspect the gloves to ensure they are sound prior to using them. How long the gloves will last depends on the use and care the user has.

### NOTES

Gloves and packaging should be disposed of as per local provisions, taking into account recycling of materials if applicable.
